Hi all,

a couple of items I've been asked to share with you.

The first is from Jane at CIIPM, and relates to a seminar that will be held THIS THURSDAY.

The second item is from Chris and is shared for information.

The Cambridge Information and IP Meeting (CIIPM) is hosting a Zoominar on Thursday with a talk prepared for CIIPM6 meeting. The talk will be followed by Q&A with the speaker:

What IP Regime to Encourage the Use and Development of AI in the UK?

By Charlotte Guillard , UKIPO

on 17 March at 13:00 via CIIPM Zoom.

To confirm your place and receive the zoom link, please email admin@ciipm.co.uk

There is now some guidance on the UKIPO website about the upcoming new WIPO ST.26 standard for patent applications with biological sequence listings - <https://www.gov.uk/government/publications/changes-for-patent-applications-with-biological-sequence-listings>. The new standard comes into effect this July.

Kathy
